

lbann::mean_squared
_error_metric::evaluate
_compute

```
graph LR; A[lbann::mean_squared_error_metric::name] --> B[lbann::mean_squared_error_metric::evaluate_compute]
```

A diagram showing a call from the `lbann::mean_squared_error_metric::name` function to the `lbann::mean_squared_error_metric::evaluate_compute` function. The `name` function is in a white box on the right, and the `evaluate_compute` function is in a gray box on the left. A blue arrow points from the `name` box to the `evaluate_compute` box.
